

24-port PoE network switch

Article Overview

A 24-port PoE network switch delivers both data and power over Ethernet to multiple devices, ideal for IP cameras, access points, and VoIP phones, with options ranging from unmanaged to smart managed switches.

Key Features

Port Configuration and Speeds: Most 24-port PoE switches provide 24 RJ45 ports supporting 10/100/1000 Mbps (Gigabit) or 100 Mbps (Fast Ethernet) speeds. Some models include additional SFP or combo uplink ports for fiber connectivity, enhancing network flexibility (TP-Link TL-SG2424P, PS1024) . **PoE Standards and Power Budget:** Switches support IEEE 802.3af (PoE) and 802.3at (PoE+), with total power budgets ranging from 100W to 180W or higher. High-power models like the UniFi Pro 24 can deliver PoE++ for devices requiring more power . Each port typically provides 15.4W (PoE) or up to 30W (PoE+) per device. **Management Options:**

- Unmanaged switches (e.g., PS1024, Hikvision DS-3E1326P-EI-M) are plug-and-play, suitable for simple deployments .
- Smart or managed switches (e.g., D-Link DGS-1100-24P, TP-Link TL-SG2424P) offer VLAN support, QoS, bandwidth control, SNMP monitoring, and web/CLI management, allowing better traffic segregation and network optimization .
- Reliability and Protection:** Many switches include 6 kV surge protection, adaptive power supply to reduce loss, and long-range PoE transmission up to 300 meters for IP cameras, ensuring stable operation in harsh environments .
- Special Features:**
 - Surveillance VLANs and VIP ports prioritize video traffic for security cameras .
 - Fanless designs are available for silent operation in office environments (non-PoE...
