

4-core fiber distribution box for base stations

Article Overview

A 4-core fiber distribution box is a compact, secure enclosure for terminating, splicing, and distributing up to four fiber optic cables, suitable for both indoor and outdoor base station installations.

Overview

A 4-core fiber distribution box serves as a termination and distribution point where feeder cables connect to drop cables in FTTH, FTTX, or base station networks. It supports fiber splicing, patching, and splitting, providing organized management of fiber connections while protecting them from environmental damage .

Key Features

- Capacity: Supports up to 4 fiber cores, with internal trays for splicing and optional 1×4 PLC splitters for network expansion .
- Adapters: Compatible with SC UPC, SC APC, and LC duplex adapters for flexible connectivity .
- Mounting Options: Can be wall-mounted or pole-mounted, suitable for corridors, basements, building outer walls, or outdoor utility poles .
- Environmental Protection: IP65-rated for dust and moisture resistance, UV-resistant, and weatherproof for outdoor deployment .
- Material: Made from flame-retardant, UV-resistant ABS or high-impact plastic for durability .
