

8-Port 100Mbps Access Switch

Article Overview

You can use an 8-port 10/100Mbps unmanaged switch, with optional PoE support for devices like IP cameras and access points.

TP-Link TL-SF1008P

The TL-SF1008P is an 8-port 10/100Mbps desktop switch with 4 PoE+ ports. It supports IEEE 802.3af/at PoE+ standard, providing up to 30 W per PoE port and a total 66 W PoE budget. This allows powering devices such as IP cameras, access points, and IP phones without separate power adapters. The switch features plug-and-play installation, auto-negotiation for 10/100 Mbps, and priority mode for ports 1-2 to ensure stable operation of critical devices. It also supports extended PoE transmission up to 250 meters at reduced speed (10 Mbps) for long-distance deployments. The metal casing ensures durability and long product life .

D-Link DES-1008PA

The DES-1008PA is another 8-port Fast Ethernet switch with 4 PoE ports compliant with IEEE 802.3af. Each PoE port can supply up to 15.4 W, with a total PoE budget of 52 W. It is fanless, making it suitable for quiet environments, and supports Auto-MDI/MDI-X and auto-negotiation for 10/100 Mbps connections. This switch is ideal for small offices or home networks where PoE devices need to be powered without additional cabling .

TP-Link LS1008 (Non-PoE Option)...
