

86 Fiber Optic Panel Price

Article Overview

The price of an 86-type fiber optic panel ranges from ¥0.11 to ¥5.34 per unit, depending on model and features.

The 86-type fiber optic panel is designed for FTTR all-optical networking and smart home weak current boxes, compatible with national standard 86 boxes, and supports SC/LC interfaces for both surface-mounted and concealed installation . Pricing varies based on the panel's complexity and durability:

- Ultra-basic entry-level model: ¥0.11 per unit
 - Dual-port surface-mounted model: ¥3.74 per unit
 - High-end reinforced version: ¥5.34 per unit
- These panels are made with high-precision molds, flame-retardant materials, and reinforced metal structures, ensuring network stability and long-term durability . Bulk purchasing through platforms like 1688 can further reduce costs, and direct factory shipment eliminates intermediary fees, making the pricing more transparent and controllable . When budgeting for a project, consider that the total cost may also include connectors, patch cables, and installation labor, which can vary depending on the number of ports, fiber type, and installation environment . For large-scale deployments, bundling services and coordinating with suppliers can help optimize costs.
