

ASEAN Cable Tray Price Inquiry

Article Overview

Cable tray prices in ASEAN vary by type, material, and size, with ladder, solid-bottom, trough, and wire-mesh trays typically ranging from \$10 to \$50 per meter, depending on specifications and local market conditions.

Market Context

The ASEAN cable tray market is driven by rapid urbanization, energy infrastructure expansion, and growth in data centers and telecommunications networks. Major industrial economies like Indonesia, Thailand, Malaysia, Vietnam, and the Philippines dominate both production and consumption, while emerging markets such as Cambodia, Laos, and Myanmar rely heavily on imports or project-based shipments. Prices are influenced by steel and aluminum costs, manufacturing efficiency, and logistical factors within the ASEAN Economic Community (AEC) framework .

Price Ranges by Type and Material

- Ladder-type cable trays (hot-dip galvanized steel, standard 2.4 m length) typically cost \$10–\$25 per meter depending on height and load capacity .
- Solid-bottom and trough trays are slightly higher, often \$15–\$35 per meter, due to additional material and fabrication requirements .
- Wire-mesh trays and channel trays are generally \$12–\$30 per meter, favored for lightweight or flexible installations .
- Accessories such as coupler plates, brackets, and elbows range from \$1 to \$30 per piece, depending on size and material
