

Adss optical cable hanging hardware

Overview

When installing ADSS optical cables, you need various hardware fittings including ADSS tension (or anchor) clamps for securing the cable to terminal and tension towers, ADSS suspension clamps for supporting the cable along spans, pole brackets and fastening straps for attaching. When installing ADSS optical cables, you need various hardware fittings including ADSS tension (or anchor) clamps for securing the cable to terminal and tension towers, ADSS suspension clamps for supporting the cable along spans, pole brackets and fastening straps for attaching. ADSS Anchor Tension Clamps are hardware fittings used to securely terminate and anchor ADSS fiber optic cables on poles or towers without damaging the cable. ADSS Suspension Clamps are used to support ADSS fiber optic cables on poles by allowing safe hanging with controlled grip and minimal stress. ADSS cable accessories are simply fittings that are used to fix the ADSS cables to the poles so that the cables can perform their duties as required. ADSS Accessories.
