

Are industrial-grade switches used for outdoor monitoring boxes

Overview

Ruggedized PoE (Power over Ethernet) enabled industrial grade network switches play a crucial role in outdoor CCTV systems, providing power and data connectivity to IP cameras and other network devices. As the core equipment of outdoor monitoring networks, the stability of industrial switches in harsh environments directly affects the effectiveness of the entire monitoring system. 1□ The challenge of harsh environments for outdoor monitoring □1□ Extreme temperature changes In the hot summer. The GW-PBOX108SFG is an industrial-grade outdoor PoE switch box with 8 Gigabit PoE ports and 2 SFP uplink slots, designed for harsh environments from -40°C to 75°C. It also ensures high reliability by providing an isolated power source that. While commercial-grade switches are suitable for climate-controlled data centers, they invariably fail when subjected to the thermal cycling, mechanical vibration, and electromagnetic interference (EMI) typical of a factory floor or outdoor substation.
