

Brazilian cable tray prices

Article Overview

Brazilian cable trays come in ladder, perforated, and solid-bottom models, made from steel, aluminum, or fiberglass, with prices influenced by material, load capacity, and certifications.

Types and Materials

Brazilian cable trays are available in several main types to suit different industrial and commercial applications:

- Ladder trays: Ideal for heavy-duty cabling and long spans, providing excellent ventilation and easy cable access.
- Perforated trays: Suitable for medium loads, offering flexibility and moderate ventilation.
- Solid-bottom trays: Used for sensitive cables requiring protection from dust, moisture, or electromagnetic interference. Materials commonly used include galvanized steel, stainless steel, aluminum, and fiberglass, each offering varying levels of corrosion resistance, fire safety, and load capacity. Fiberglass trays are often chosen for chemical or coastal environments due to their high corrosion resistance, while steel trays dominate industrial and commercial installations due to cost-effectiveness and strength .

Pricing Overview

Pricing in Brazil is influenced by raw material costs, manufacturing processes, certifications, and logistics. Steel-based ladder trays are the most common and gen...
