

Cameroon Special Optical Cable

Overview

SAIL is a (4×2 pair) submarine cable that links Cameroon (from the city of Kribi) to Brazil (city of Fortaleza) over an approximate distance of 6000 Km. Operational since September 2018 with a capacity of 32 Tbps, it enables the intercontinental transportation of traffic between the. Cameroon has long been presented as a hub in terms of telecom infrastructure in the Central African sub-region. The country is connected to five optical fiber submarine cables (SAT3, WACS, ACE, SAIL, and NCSCS). Yet it makes very little use of this equipment to develop its telecoms sector, as well. Incumbent operator CAMTEL will kick off the rollout of an additional 3,500 kilometers of terrestrial fiber across Cameroon in 2024. The company's network currently extends over 15,000 km. The incumbent operator Cameroon Telecommunications (Camtel) plans to install 3,500 km of additional optical fiber from 2024 across Cameroon. Government has officially handed over to Cameroon Telecommunications, CAMTEL, a 78-strand fibre optic cable deployed overhead in the Southern Interconnected Grid, SIG, along the Yaounde-Boumnyebel-Edea-Kribi-Douala-Limbe-Nkongsamba-Bafoussam-Bamenda segment.

Article Content

Cameroon - Connection to submarine fiber optic cables

Presented as a hub in terms of telecoms infrastructure, Cameroon is connected to five submarine fiber optic cables: SAT3, WACS, ACE, SAIL and NCSCS.

Cameroon - Connection to submarine fiber optic cables

Through this agreement, Camtel, which holds a monopoly on fiber optic management in Cameroon, allows MTN GlobalConnect to market four

Cameroon's Camtel uses only 16% of submarine cable capacity, ROI

The CFA100 billion project was financed 85% by China's Exim Bank and 15% by the state through the Special Telecommunications Fund. Nearly a decade later, with just 16% of capacity being used,

Camtel's Underused Submarine Cables Reach Only 16% Capacity

Cameroon Telecommunications (Camtel) uses only 16% of its four submarine cable capacities. A Supreme Court report highlights underutilization, citing low internet penetration and high transit

Nexans Connects Brazil to Cameroon in Its First Ever

As a phase II of Cameroon's National Broadband Network development ("NBNII"), the SAIL project will link Cameroon to Brazil. Nexans has

Telecom regulator announces audit of National Fiber Optic Network

The Telecommunications Regulatory Agency (ART) announces that it has received directives from the government to conduct an operational audit of the national fiber optic network.

CAMTEL gets big gov't support to boost optical fibre network

Government has officially handed over to Cameroon Telecommunications, CAMTEL, a 78-strand fibre optic cable deployed overhead in the Southern Interconnected Grid, SIG, along the

Camtel to roll out additional 3,500 km fiber optic cable in

Incumbent operator CAMTEL will kick off the rollout of an additional 3,500 kilometers of terrestrial fiber across Cameroon in 2024. The plan was announced by Judith

MTN GlobalConnect and CAMTEL accelerate

MTN GlobalConnect and CAMTEL have joined forces to establish a strategic partnership that will see the commercialisation of four submarine cables

Nexans Connects Brazil to Cameroon via SAIL Fibre Optic Project

Nexans has manufactured and tested 6,000 km of submarine fibre optic cables for the South Atlantic Inter Link (SAIL) project connecting Cameroon to Brazil, enabling a faster and more

MTN GlobalConnect and CAMTEL Accelerate Cameroons Fibre

July 27th 2021: MTN GlobalConnect and CAMTEL have joined forces to establish a strategic partnership that will see the commercialisation of four submarine cables in the West and Central sub-region of
