

Can fiber optic cables be laid in South Sudan where there are no fiber optic cables

Overview

The Government of South Sudan, in collaboration with the World Bank, will begin laying a fiber optic cable from Kenya early next year, a move aimed at strengthening the country's digital infrastructure and improving internet connectivity. Speaking during a panel at the African Innovation Summit in Addis Ababa. South Sudan has announced a 2,400 kilometre national fibre optic network that would connect the landlocked country to the Indian Ocean through Kenya, with construction targeted to begin in December. The plan, revealed by Telecommunications Undersecretary Thomas Gatkuoth at a digital governance. The decision, announced on Friday by Telecommunication Undersecretary Thomas Gatkuoth Nyak, followed extensive discussions by the project's steering committee, chaired by Deputy Minister David Yau Yau. The country faces many challenges similar to those faced by countries coming out of conflict situation. Telecommunication Undersecretary Engineer Thomas.
