

Case Study of Cable Management System Installation in Madagascar

Overview

In Antananarivo, Colas is building an urban cable transport system: civil engineering, foundations, pylons, and system assembly to support sustainable urban mobility. Activity: Urban transport Location: Antananarivo, Madagascar Project Duration: 3 years Project Year: 2023-2025 Details of Works: Network diversions, deep foundations, civil engineering for pylons, post-work site restoration, buildings, and installation of the mechanical lift system. Employees. The 2Africa subsea cable system has made another step forward, this time landing in the island nation of Madagascar as it works its way up Africa's East Coast. In a large city. With the most-capable infrastructure management tools, the fiber plant, patching, and power chain live in a single model. This project was hinted at by Andry Rajoelina, the president of Madagascar.
