

Category 5e wall-mounted fiber optic panels

Article Overview

Category 5e wall-mounted panels provide organized, high-performance connectivity for Ethernet and fiber optic networks, supporting efficient cable management and flexible installation.

Overview

Category 5e (Cat5e) wall-mounted panels are designed to terminate and organize Ethernet cabling in structured network environments. They are commonly used in offices, data centers, and telecommunications rooms to consolidate multiple network connections in a single, accessible location. These panels can also integrate with fiber optic enclosures to provide hybrid connectivity solutions for high-density networks .

Key Features

- **Port Configuration:** Cat5e panels typically come in 12, 24, or 48-port configurations, allowing for scalable network expansion .
- **Termination Type:** Most panels use 110-style punch-down connections, which are standard for fast and reliable terminations .
- **Color Coding:** Panels are marked for EIA568A/B wiring standards, ensuring compatibility with all Cat5e installations .
- **Identification:** Write-on surfaces or labeling areas make port identification simple and organized .
- **Mounting:** Wall-mounted panels are designed for indoor or outdoor enclosures, pr...
