

China-Europe Communication Tower Inspection Solution

Overview

Transmission corridors, towers, insulators, fittings, tree-obstruction risks, and post-disaster patrols. By capturing high-resolution imagery and 3D mapping data, this service ensures that critical communication systems remain. Our Communications Tower inspection service dramatically reduces risk, cost and downtime by replacing slow, labour-intensive climbs with fast, repeatable drone surveys. We have the latest payloads, including Infra-Red (IR), Visual (VIS) and LIDAR. Empire Unmanned's advanced drone services extend beyond standard. Optelos delivers precision cell tower inspections through drone data capture and advanced digital twin modeling—streamlining audits, lease assessments, PIM mitigation, and post-construction closeouts. Our services are available on a per-project basis, with no subscription required. It is possible to easily setup flight routes just by inputting the position, height and size of the tower you.
