

Complete List of Distribution Box Product Models

Article Overview

Distribution boxes come in multiple types and configurations, including main, sub, meter, consumer, control, lighting, and power distribution boxes, each designed for specific applications and environments.

Main Types of Distribution Boxes

- Main Distribution Board (MDB) – Central hub for distributing electricity to various sections in residential, commercial, or industrial units. Includes bus bars, MCCBs, and support equipment for overload protection and circuit management .
- Sub Distribution Board (SDB) – Transfers electricity from the main board to specific areas like garages, parking lots, or individual floors. Provides localized control and protection .
- Meter Panel – Houses electrical meters to monitor power consumption. Can include primary switches, fuses, and RCDs for safety .
- Panel Fuse Bank – Contains multiple fuses for circuit protection, commonly used in industrial or commercial setups .
- Unitized Panel – Modular panels designed for flexible installation and easy maintenance .
- Transfer Switch
- Manual Transfer Switch – Operates manually to switch power between main and backup sources.
- Automatic Transfer Switch – Automatically manages power distribution between sources, often with timer settings
