

Cost of Customizing a Cable Tray Riveting Machine

Article Overview

Customizing a cable tray riveting machine typically ranges from \$15,000 to \$50,000 or more, depending on automation, production capacity, and specific OEM requirements.

Price Factors

The cost of a customized cable tray riveting machine depends on several key factors:

- **Automation Level:** Fully automated machines with automatic rivet feeding, dual-gun options, and robotic integration are more expensive than semi-automatic or manual setups .
- **Production Capacity:** Machines designed to handle high volumes, such as 3,600 rivets per hour, require robust construction and advanced control systems, increasing the price .
- **Customization Requirements:** OEM customization for specific rivet types, tray sizes, or specialized processes (e.g., center spine forming, embossing, automatic welding) adds to the cost .
- **Tooling and Accessories:** Quick-swap gun heads, vibratory feeders, and diagnostic systems are additional investments that improve efficiency but raise the upfront cost .
- **Manufacturer Reputation and Support:** Established suppliers with strong after-sales service may charge a premium for reliability and technical support
