

Distribution box asf

Article Overview

ASF containers (Abfall-Sammler-flüssig) are specialized galvanized containers designed for the safe collection, storage, and transport of hazardous liquids.

Overview

ASF containers are primarily used in industrial, laboratory, and workshop environments to handle hazardous liquid waste safely and in compliance with legal regulations . They are part of a broader system of safety containers, which also includes ASP containers for pasty or solid substances. The term ASF stands for Abfall-Sammler-flüssig, meaning "waste collector for liquids," while ASP stands for Abfall-Sammler-pastös, for pasty or solid waste .

Design and Features

- **Material:** Typically fire-galvanized steel, ensuring durability and resistance to corrosion .
- **Construction:** Available in single-wall or double-wall designs, depending on the level of containment required .
- **Capacity:** Varies by model, with some containers designed for large volumes, such as 800 liters .
- **Specialized versions:** Certain ASF containers are designed for oil-containing substances that require documentation and compliance with environmental regulations .
- **Transport compliance:** Many ASF containers are UN-approved for the transport of hazardous liquids under ADR/GGVSE regulations
