

Ear Mounting Bracket for Distribution Box

Article Overview

Ear mounting brackets, or rack ears, allow distribution boxes, UPS systems, and network equipment to be securely mounted in standard 19-inch racks.

Overview

Ear mounting brackets, commonly called rack ears, are metal brackets attached to the sides of equipment to enable secure installation in a rack or cabinet. They are essential for 2U, 1U, or other rack-mountable devices, providing stability and support, especially for heavy equipment like UPS systems or network switches . Some brackets are universal and adjustable, while others are designed for specific brands or models such as Cisco, NETGEAR, Dell, or Eaton .

Types of Rack Ears

- **Universal Rack Ears:** Compatible with most 19-inch racks and various devices. They often include multiple screw holes for flexibility .
- **Heavy-Duty L-Bracket Ears:** Designed for front-mounting heavy equipment, supporting up to 65 pounds without rear support .
- **2U or 1U Specific Ears:** Sized for standard rack units, often sold in pairs with screws included .
- **Brand-Specific Kits:** Some kits are tailored for specific devices, such as Cisco SG300/SG350 series, ensuring perfect fit and alignment .
