

FTTR Fiber Optic Terminal Box

Article Overview

The FTTR 2115/2121 Fiber Optic Terminal Box is a popular hot-selling model for high-speed, room-to-room fiber networks.

Overview of FTTR Terminal Boxes

FTTR (Fiber to the Room) terminal boxes are designed to terminate, manage, and distribute fiber-optic connections directly to individual rooms in homes or commercial buildings, ensuring ultra-fast and reliable internet connectivity . These boxes are compatible with various fiber connectors, including SC, FC, ST, LC, duplex, and simplex, and can be purchased as fully assembled units or empty panels for flexible installation .

Key Features of Hot-Selling Models

- **High Compatibility:** Supports multiple connector types and both single-mode and multi-mode fibers .
- **Durable Construction:** Many models include protective layers to shield fibers from crushing, moisture, and physical stress, making them suitable for indoor and harsh environments .
- **Integrated Splitters:** Some terminal boxes, like the YINGDA PLC splitter models, include 1xN or 2xN splitters for distributing optical signals to multiple rooms or devices .
- **Space-Efficient Design:** Compact fiber trays allow for neat cable routing and storage, with provisions for steel tube fixation and wall-mounted installation .
- **Future-Proofing:** Designed for high-bandwidth applications, supporting speeds up...
