

# Fiberglass cable trays in stock

## Article Overview

Fiberglass cable trays can be purchased from specialized suppliers by selecting the appropriate type, size, resin system, and installation requirements for your project.

### Understanding Fiberglass Cable Trays

Fiberglass cable trays, also known as FRP (Fiberglass Reinforced Plastic) or GRP trays, are lightweight, corrosion-resistant, and non-conductive systems used to support and route electrical, telecom, or control cables in industrial and outdoor environments . They are available in various forms, including ladder trays, trough trays, channel trays, and covered trays, with options for custom sizes and colors . The trays are made from glass fiber reinforcement and resin matrices such as polyester or vinylester, which determine their chemical resistance, UV durability, and fire performance .

### Key Considerations Before Purchasing

- **Load and Span Requirements:** Determine the weight of cables and the distance between supports to select a tray with sufficient strength .
- **Environmental Conditions:** Consider exposure to chemicals, moisture, UV light, or high temperatures to choose the appropriate resin system (polyester or vinylester), .
- **Tray Type and Size:** Choose between ladder, channel, or covered trays based on cable protection needs, ventilation, and site layout .
- **Compliance and Safety:** Ensure the trays meet standards such as ASTM E-84 Class 1 Flame Rating and ASTM D-635 self-extinguishing requirements .
- **Installation Method:** Verify that the trays can be mounted on walls, ceilings, or supports using standard hardware, and that cutting or fabrication can be done safel...
