

Fixing of Lighting Distribution Box

Article Overview

Fixing a lighting distribution box involves ensuring safety, checking power supply, inspecting fuses or breakers, testing wiring, and repairing or replacing faulty components.

Safety First

Before starting any repair, turn off the main power supply to avoid electric shock. Use insulated tools and wear protective gloves if necessary. Never touch live parts while the box is energized .

Step 1: Check the Power Supply

Ensure that the incoming power is normal and the power cord is properly connected. If the supply is unstable, the distribution box may not function correctly .

Step 2: Inspect Fuses and Circuit Breakers

- Tripped breakers or blown fuses are common causes of lighting failure. Reset tripped breakers or replace blown fuses .
- For frequent tripping, check for overload conditions where the total connected load exceeds the rated capacity of the breaker .

Step 3: Examine Wiring Connections

Loose or disconnected wiring can prevent the system from operating. Inspect all co...
