

How much does a complete three-level distribution box cost

Article Overview

A complete three-level distribution box typically costs between \$1,500 and \$6,000, depending on capacity, materials, features, and installation requirements.

Price Breakdown

The cost of a three-level distribution box depends on several factors:

- **Enclosure Material:** Basic ABS plastic units are inexpensive, while powder-coated steel or high-grade stainless steel enclosures significantly increase the price due to durability and corrosion resistance .
- **Internal Components:** Adding high-quality circuit breakers, surge protectors, busbars, and smart monitoring systems can raise the cost substantially .
- **Capacity and Amperage:** Residential panels (100-125A) typically cost \$1,200-\$2,500 including labor, while higher-capacity outdoor panels (200A) can reach \$3,000-\$6,000 .
- **Installation and Labor:** Professional installation can range from \$1,300 to \$1,800 for standard residential setups, with industrial or complex installations requiring more labor and potentially weeks of work .
- **Additional Features:** Smart monitoring, remote control, energy management, and weather-resistant enclosures add to the upfront cost but can provide long-term savings and operational efficiency .
