

How much does it cost to hang fiber optic cables on a steel tower

Article Overview

Installing fiber optic cables on a steel tower typically costs between \$0.50 and \$4.50 per foot, depending on cable type, labor, and installation complexity.

Material Costs

Fiber optic cable prices vary by type and strand count. Single-mode fiber generally costs \$0.10 to \$0.50 per foot, while multimode fiber ranges from \$0.30 to \$1.00 per foot. Armored or outdoor-rated cables suitable for aerial deployment can cost \$0.50 to \$5 per foot. Higher strand counts, such as 24, 72, or 288 fibers, increase the cost proportionally. Pre-terminated assemblies or specialized connectors may further raise material expenses .

Installation Costs

Aerial installation on steel towers is generally less expensive than underground deployment. Typical aerial fiber installation costs range from \$40,000 to \$60,000 per mile, while underground runs can cost \$5,000 to \$20,000 per mile . For shorter commercial or campus runs, total project costs often fall between \$3,000 and \$15,000, depending on labor, permits, and environmental conditions . Labor costs include tower access, cable attachment, splicing, and testing.
