

How to install the 7-shaped clips on cable trays

Article Overview

7-shaped clips are installed by positioning them over the tray edge, securing cables or tray sections, and tightening with appropriate fasteners to ensure stability and compliance.

Preparation

Before installation, ensure you have the correct personal protective equipment (PPE), including gloves, safety glasses, and a hard hat. Inspect the cable tray system for any damage and confirm that the tray route is clear of obstructions such as pipes or HVAC ducts. Verify that the 7-shaped clips are compatible with your tray type (ladder, perforated, or solid-bottom) and that you have the necessary tools, such as a wrench, screwdriver, or pliers, depending on the clip design .

Installation Steps

- **Position the Clip:** Place the 7-shaped clip over the edge of the cable tray or around the cable bundle. The clip should fit snugly without forcing it, ensuring it aligns with the tray's mounting holes or edges .
- **Secure the Clip:** Insert the fastener (bolt, screw, or nut) through the clip and into the tray or support bracket. Tighten the fastener gradually to hold the clip in place while avoiding over-tightening, which could deform the tray or damage the cable insulation .
- **Check Alignment:** Ensure the clip is perpendicular to the tray and that cables are properly seated within the clip. Maintain proper spacing between clips according to...
