

How to install the cable management rack clips in the server rack

Article Overview

To install cable management rack clips, select the appropriate bracket for your rack depth, align it with the rack units, and secure it using the provided screws.

Step 1: Choose the Correct Cable Management Bracket

Server racks often come with two types of cable management bars: a wider bar for shorter-depth racks and a shorter bar for deeper racks. Select the bar that matches your rack's depth to ensure proper fit and alignment . Each bracket typically occupies three EIA units vertically.

Step 2: Mark Screw Locations

Hold the bracket against the inside of the rack flange where you plan to install it. Using a sticker or pen, mark the middle hole of each of the three EIA units on both sides of the rack flange. This ensures accurate alignment when fastening the bracket .

Step 3: Assemble the Bracket

Attach the cable management bar to the bracket using the M3 screws provided. Ensure the bar is securely fastened before mounting it to the rack .

Step 4: Attach the Bracket to the Rack...
