

How to open the beam splitter

Overview

Note that no matter what filter thread size is on your camera lens, you MUST first snap the 55mm adapter ring onto the Beam Splitter. It is easier if you insert one flange of the 55mm ring into the adapter hole, and line the opposite flange up with the wider part of the hole labeled. The OS-8171 Beam Splitter is designed to be used with the OS-8170 Brewster's Angle Accessory and the OS-8539 Educational Spectrophotometer System.) In the Brewster's Angle experiment, the Beam Splitter is used with a. e operator and those around the log splitter. Therefore, it is IMPORTANT to review this product manual and other product materials thoroughly and be fully aware and knowledgeable of the assembly, operation, dangers and maintenance of the product before use. It is a crucial part of many optical experimental and measurement systems, such as interferometers, also finding widespread application in fibre optic telecommunications. In its. am Splitters/Combiners. The standard product is designed for use in the visible spectrum (400-700 nm wavelength). If using the beamsplitter with the front-surface mirror please remove the protective blue film from the mirrors before using.
