

# How to quote a price for a construction site electrical distribution box

## Article Overview

High-quality construction site electrical distribution boxes typically range from a few hundred to several thousand dollars depending on specifications, materials, and customization options.

### Cost Factors

The price of a construction site distribution box depends on several key factors:

- **Material and Durability:** Boxes can be made from sheet steel, aluminum, stainless steel, or thermoplastic. Outdoor-rated, weather-resistant enclosures (IP65 or higher) command higher prices due to corrosion resistance and impact protection .
- **Voltage and Amperage Capacity:** Single-phase or three-phase systems, along with the number of circuits, influence cost. Industrial-grade boxes with higher amperage and multiple circuits are more expensive .
- **Customization:** Custom designs, including pre-wired configurations, internal doors, and specific outlet types, increase the price. Suppliers like EWJ and Coloria offer tailored solutions based on project requirements .
- **Safety and Compliance:** Compliance with international standards (IEC 61439, IEC 60364, CE, ISO9001, RoHS) and features like fire-resistant materials, overload protection, and smart monitoring can affect pricing .
- **Quantity and Lead Time:** Bulk orders may reduce per-unit cost, while rapid delivery or prototype production can increase it ....
