

Imported NEMA4X fiber optic cable clamps

Article Overview

Imported NEMA4X fiber optic cable clamps are durable, corrosion-resistant clamps designed for secure outdoor fiber optic installations, protecting cables from water, dust, and environmental damage.

Overview

NEMA4X-rated fiber optic cable clamps are engineered to withstand harsh outdoor conditions, including rain, dust, and corrosive environments. They are commonly used in FTTx networks, ADSS, and drop cable installations to maintain cable integrity and prevent signal degradation. These clamps are typically made from UV-resistant thermoplastics, stainless steel, aluminum alloy, or galvanized steel, ensuring long-term durability and compliance with NEMA4X standards for water and corrosion resistance .

Types and Features

- **Tension Clamps:** Designed to maintain the tensile state of fiber cables, ideal for aerial installations along poles or buildings. They secure cables without stripping insulation and are easy to install without special tools .
- **S-Type Drop Cable Clamps:** Insulated or plastic clamps that reduce the working load on support wires, prevent electrical surges, and offer excellent corrosion resistance and long service life .
- **Clamp and Bracket Kits:** Often include a cable clamp and support bracket to maint...
