

Indoor complete set of equipment for distribution boxes

Article Overview

A complete indoor distribution box setup includes the enclosure, circuit protection devices, bus bars, neutral and grounding links, wiring accessories, and optional smart monitoring modules.

Core Components

- **Enclosure:** The outer casing protects all internal components from dust, moisture, and physical damage. Indoor enclosures are typically made from ABS, polycarbonate, or thermoplastics and come in various IP protection classes (IP20-IP65) depending on safety requirements and environmental conditions .
- **Circuit Protection Devices:**
 - **Miniature Circuit Breakers (MCBs):** Protect individual circuits from overloads and short circuits.
 - **Residual Current Circuit Breakers (RCCBs/RCDs):** Detect leakage currents to prevent electric shocks.
 - **Switch Disconnectors or MCCBs:** For higher current protection and main incomer control .
- **Bus Bars:** Metal strips that distribute electricity to multiple circuits. They include phase, neutral, and grounding bars to ensure safe and organized power distribution .
- **Wiring Accessories:**
 - Cable glands and knockouts for secure cable entry.
 - Wire end ferrules, crimping tools, and plug-in terminals for reliable connections.
 - Cable ties and labeling for organized wiring
