

Intelligent PDU Communication

Overview

An intelligent PDU now plays a central role in supporting high-density compute, giving operators real-time visibility into load, environmental conditions, and branch-level behavior while enabling remote control and faster fault response. Norden Intelligent PDUs are designed to provide real-time power monitoring, control, and management across data centres, server rooms, and critical infrastructure environments. With advanced metering, remote monitoring, and outlet-level control capabilities, they enable informed decision-making. Generate Instant Quote – Create and download quotes instantly for review or approval. Place Order – Seamlessly place your order with just a few clicks. Reduce IP addresses by Daisy Chaining up to 64 PDU's. It is capable of monitoring, managing, and controlling power consumption to multiple devices.
