

Japan s optical fiber cable construction

Overview

The construction of the JAKO cable system is scheduled to begin in 2025 and conclude by 2027. (Director, President and CEO: Okada Naoki) is pleased to announce that the new SWR[™] factory, which had been under construction within its Sakura Works in Chiba Prefecture, has been completed and is now in operation. The new factory will produce intermittently fixed Optical Fiber. The Japan-Korea (JAKO) submarine cable system is a 260-kilometer high-speed undersea optical fiber cable linking Fukuoka, Japan, with Busan, Korea. The JAKO consortium comprises Microsoft (MS), Amazon Web Services (AWS), Korean operator Dreamline, and Japanese operator Arteria Networks, partnered. Furukawa Electric Group specializes in telecommunications and offers a range of fiber optic cables and components as part of its information and communication solutions. Their commitment to precision, quality, and continuous improvement has positioned Japan as a leader in this critical infrastructure sector. A lot of this demand is coming from the US, noted the company, which said it will look to increase.
