

Laos Professional Temperature Measuring Optical Cable Manufacturer

Article Overview

Laos has several manufacturers and suppliers capable of providing optical cables suitable for temperature measurement applications, including MISUZU Lao and Watana Wire & Cable Company.

Local Manufacturers

MISUZU Lao Co., Ltd. is based in Savannakhet, Laos, and operates three factories producing a variety of electrical wires and cables, including ultra-fine wires, flat cables, solar cables, and coaxial cables. While primarily focused on electrical and coaxial cables, their manufacturing capabilities suggest potential for custom optical cable production for temperature sensing applications. The company is located in the Savan-Seno Special Economic Zone, strategically positioned along the East-West Economic Corridor near the Thailand border. Watana Wire & Cable Company (WWCC), headquartered in Vientiane, Laos, is a leading manufacturer of electric wires and cables with over 20 years of experience. They use premium raw materials such as copper, aluminum, and cable-grade PVC, and their facilities are ISO 9001 certified. While their primary focus is on electrical cables, their advanced manufacturing technology and research capabilities may support specialized optical cable production for industrial temperature monitoring.
