

Malta Outdoor Integrated Power Supply Low-Loss Solution

Article Overview

Malta offers a scalable, low-loss outdoor integrated power supply solution combining long-duration energy storage, flexible power delivery, and renewable integration for industrial, commercial, and off-grid applications.

Overview of Malta's Solution

Malta Inc. has developed a utility-scale, long-duration energy storage system that delivers both power and heat using steam-based heat pump technology. The system is designed for high efficiency and low energy loss, providing synchronous generation for grid reliability without emissions. It can discharge energy for 8 hours to multiple days, making it suitable for continuous industrial operations, data centers, and city-scale applications. The solution uses abundant, non-hazardous materials like salt, ensuring a circular, zero-waste design that is fully recyclable.

Key Features

- **Low-Loss Efficiency:** Malta's system is engineered to minimize energy losses during storage and discharge, with independent charge and discharge cycles tailored to operational needs.
- **Scalable Power Output:** Systems can exceed 100 MW with 10+ hours of storage, adaptable for both small and large-scale deployments.
- **Flexible Integration:** Can operate standalone or integrate with renewable sources, conventional generators, or grid-connected systems, providing hybrid power solutions.
