

Manufacturer s 100G Coherent Optical Module

Article Overview

100G optical modules, including QSFP28 and coherent transceivers, are available from leading manufacturers such as FS, NEC, EPS Global, Starview Technologies, and Precision OT, supporting high-speed 100Gb/s data transmission for data centers, enterprise, and metro networks.

Overview of 100G Optical Modules

100G optical modules are designed to provide high-performance connectivity for modern networks. The most common form factor is QSFP28, which supports 4x25Gb/s channels, enabling 100Gb/s aggregate throughput. These modules are widely used in data centers, enterprise core and distribution layers, and service provider networks .

Key Manufacturers and Offerings

- FS: Offers a broad portfolio of 100G QSFP28 modules suitable for data centers and enterprise networks, with options for nearby warehouse delivery and a 30-day return policy .
- EPS Global: Provides Coherent 100G QSFP28 transceivers with advanced DSP and silicon photonics technology, supporting both direct-detect and coherent transmission for data center interconnects and metro networks .
- Starview Technologies: Supplies QSFP28 modules including 100GBASE-SR4, LR4, ER4, and ZR4, supporting transmission distances up to 80 km
