

Manufacturers selling micro-module data center equipment

Overview

Some of the top manufacturers of modular data centers include HPE, IBM, Eaton, Schneider Electric, Huawei, Dell, Vertiv, and others. Which companies are leading the field for modular data centres?

Discover the top 10 companies driving the future of modular data centres with innovative, scalable and sustainable infrastructure solutions. As computing demands surge, modular data centres are redefining how infrastructure is built. Micro data centers enable Industry 4.0 and edge computing by bringing IT wherever you need it most. EcoStruxure Micro Data Centers combine power, cooling, security, and management in one enclosure. What is a micro data center?

Micro data centers address IT integration on the factory floor, enabling highly integrated and flexible installed data center infrastructure for rapid deployment and efficient operation and maintenance. Inspur intelligent micro module product adopts factory prefabrication production and on-site modular installation technology for rapid deployment and flexible expansion. Whether looking to configure the fastest micro data center, expand capacity with colocation and cloud services, or install a modular cable landing station, Vertiv offers pre-fabricated but highly-customizable solutions. Low-risk, high-value implementations have the added benefits of faster delivery. A modular data center consists of a prefabricated data center module, including servers, racks, power supply, networking, backup, cooling, and monitoring systems that are portable and quick to assemble and deploy.
