

Obtain an inspection report for the distribution box

Article Overview

You can obtain a distribution box inspection report by hiring certified electricians, using standardized checklists, or downloading pre-built templates for documentation.

Professional Inspection Services

Hiring a certified electrician or inspection company ensures a thorough evaluation of your distribution box. During the inspection, professionals check the residual current device (RCD), fuses, wiring, main switch, connection points, and overall system condition to prevent malfunctions, fire hazards, and power outages. In the Netherlands, inspections follow standards such as NEN 1010 and NEN 3140, ensuring compliance with legal and insurance requirements (Bramsininstallaties). After the inspection, the company provides a detailed report documenting the condition and any defects.

Example Inspection Reports

You can review example reports to understand the structure and content of a distribution box inspection report. These reports typically include:

- Visual inspection results
- Measurement and testing outcomes (e.g., earth resistance, insulation resistance, residual current breaker tests)
- Identification of defects with codes indicating danger to life, fire hazard, or operati...
