

Optical module binding SN

Overview

They are VSFF (very small form factor) connectors, with three times the fiber cabling density over duplex LC. The SN is ceramic-based fiber optic connector so compact and flexible that it can be utilized either as a Base-8 trunk solution, a Base-2 patching interface or as a Base-8 connection to next generation 200G, 400G, and 800G transceivers. SENKO's SN connector is a Very Small. The Senko SN connector is a high-performance optical fiber connector designed for use in both telecom and data center applications. Designed for 400G and next-generation data rates, it enables quick polarity reversal in the field—without fiber disruption or ferrule repositioning. 25 mm fully-ceramic ferrule technology. 25mm ferrule used in the popular and proven LC.
