

Price of Flame-Retardant Cable Trays in Brazil

Article Overview

Flame-retardant cable trays in Brazil typically range from USD 20 to USD 150 per meter, depending on material, fire rating, and load capacity.

Cost Factors

- **Material Type**
 - Steel (galvanized or stainless): Common for industrial and commercial installations; fire-rated steel trays are durable and can cost USD 50–150 per meter depending on thickness and coating .
 - FRP (Fiberglass Reinforced Plastic): Lightweight, corrosion-resistant, and non-conductive; thermosetting resin FRP trays with flame-retardant properties are USD 40–120 per meter .
 - Composite or polymer trays: Flame-retardant composites are generally USD 30–100 per meter, offering moderate fire resistance and lighter weight .
- **Fire Rating and Coating**
 - Trays with special fire-resistant coatings (e.g., FLAMMOTECT-A or Thermalastic® 83C) provide enhanced protection and can increase costs by 10–30% .
 - Higher fire ratings (e.g., 2-hour WS5X rating at 1050°C) are more expensive due to specialized materials and testing requirements .
- **Tray Dimensions and Load Capacity**
 - Wider trays or those designed to carry heavier cable loads cost more. Standard widths (150–300 mm) are less expensive, while custom widths or heavy-duty spans...
