

Price of Lightweight Optical Cable Traction Machine

Article Overview

Lightweight optical cable traction machines typically range from \$1,500 to \$5,000 USD, depending on specifications, power source, and supplier.

Price Overview

The cost of a lightweight optical cable traction machine varies based on traction force, motor type, portability, and additional features. For example, small electric or battery-powered models designed for fiber optic cable installation with a traction force of around 150–200 kg generally fall in the \$1,500–\$3,000 USD range when purchased from Chinese manufacturers or online suppliers. More advanced models with higher precision, servo motors, or touch-screen controls may cost \$3,000–\$5,000 USD.

Factors Affecting Price

- **Traction Force and Capacity:** Machines with higher pulling capacity (e.g., 2 kN or more) are more expensive due to reinforced frames and stronger motors.
- **Power Source:** Electric or battery-powered machines are generally more costly than manual hand-crank models, but they offer consistent and controllable traction.
- **Portability and Weight:** Lightweight, compact machines designed for field use with handles, wheels, or mini-hydraulic systems may have a premium price due to mobility features.
- **Precision and Safety Features:** Models with adjustable torque, variable-speed drives, emergency stop systems, and touch-screen interfaces are priced higher bec...
