

Price of Nordic Cable Trays with Long Spans

Article Overview

Nordic cable trays with long spans are premium, customizable solutions, and pricing varies based on material, size, and project requirements.

Overview of Nordic Cable Trays

Nordic Wire Tray (NWT) offers X-Tray cable trays, which are designed for long spans between support brackets, making them cost-effective and easy to install. These trays are available in stainless steel, hot-dip galvanized steel, and other surface treatments, and can be custom-cut, bent, and shaped to fit unique project requirements. The trays are engineered for high load capacity, durability, and fast installation, requiring minimal fasteners and tools, which reduces labor costs.

Factors Affecting Price

- **Material:** Stainless steel trays are generally more expensive than galvanized steel due to corrosion resistance and longevity.
- **Span Length:** Longer spans reduce the number of supports needed but may require thicker or reinforced trays, affecting cost.
- **Customization:** Custom widths, bends, or perforations tailored to your project will increase the price compared to standard stock trays.
- **Quantity:** Bulk orders often reduce the per-unit cost, while small orders may have higher unit prices.
- **Accessories:** Mounting brackets, fasteners, and other installation components can add to the total cost
