

Price of Telecommunication Fiber Optic Cable Hanging Box

Article Overview

Fiber optic cable hanging boxes typically range from \$10 to \$50 for small indoor units, with larger or outdoor models costing more depending on capacity and features.

Overview

A fiber optic cable hanging box (also called a fiber termination or distribution box) is used to splice, terminate, and manage fiber optic cables. These boxes protect fibers from damage, organize connections, and are suitable for both indoor and outdoor installations. They are commonly mounted on walls, poles, or inside network rooms.

Price Range

- Small indoor boxes (2-6 ports, ABS plastic, wall-mounted) generally cost \$10-\$50 per unit.
- Medium to large indoor/outdoor boxes with multiple ports, FOSC splicing, or metal enclosures can range from \$50-\$200 depending on size, material, and features.
- High-capacity outdoor boxes designed for urban or industrial deployments may exceed \$200, especially if they include weatherproofing, multiple splice trays, or rapid deployment features.
