

# Price of Trapezoidal Cable Tray Processing

## Article Overview

The cost of a custom trapezoidal cable tray varies widely, typically depending on material, size, surface finish, and order quantity, with prices often starting from around \$50 per piece for stainless steel trays.

### General Pricing Factors

The price of cable trays is influenced by several factors:

- **Material:** Stainless steel, aluminum, galvanized steel, and FRP all have different costs. Stainless steel is the most expensive due to its corrosion resistance, while pre-galvanized steel is more affordable .
- **Tray Type and Design:** Trapezoidal or solid-through designs are usually more costly than standard ladder or perforated trays because of the custom fabrication required .
- **Size and Thickness:** Larger trays with higher side rails or thicker metal sheets increase material costs .
- **Surface Finish:** Options like hot-dip galvanizing, powder coating, anodizing, or passivation affect durability and price .
- **Quantity:** Bulk orders can reduce the per-unit cost, while small orders or single pieces are more expensive .
- **Shipping and Delivery:** International shipping or expedited delivery adds to the total cost .
