

Price of angled cable trays and staircases

Article Overview

Hot-dip galvanized ladder-type cable trays typically cost around \$50-\$100 per 2.4-meter section, with angled or stair-step fittings priced per piece, while staircase pricing varies widely depending on material and design.

Cable Tray Pricing

Standard hot-dip galvanized ladder cable trays (2.4 meters long) are commonly priced between \$50 and \$100 per section, depending on width, load capacity, and supplier . Accessories such as 90-degree bends, 45-degree bends, tee bends, and stair-step or angled fittings are sold separately, usually per piece, and can range from \$15 to \$60 each, depending on size and material . Material options affect pricing significantly:

- Stainless steel (304 or 316): higher corrosion resistance, more expensive than galvanized steel .
- Electro-galvanized steel: moderate cost, suitable for indoor use .
- PVC or halogen-free plastic trays: lower cost, lightweight, and fire-resistant . Angled or stair-step cable trays are designed to route cables vertically or around obstacles. These are priced per fitting, and the cost depends on the angle, width, and material. For example, a hot-dip galvanized 45-degree bend may cost around \$20-\$40, while a 90-degree bend or stair-step fitting can be \$30-\$60 .

Staircases

If the query refers to structural staircases rather than cable tray stair-step fittings, p...
