

Price of electrical distribution box in construction site basement

Article Overview

Electrical distribution boxes for construction sites typically range from \$150 to \$1,000 or more, depending on capacity, material, and features.

Price Range and Factors

The cost of a construction site electrical distribution box depends on several factors:

- **Material and Build:** Boxes can be made from sheet steel, thermoplastic, or fiberglass, with steel and fiberglass generally costing more due to durability and impact resistance .
- **Capacity and Current Rating:** Small boxes for single-phase 60A supply may start around \$150-\$250, while larger three-phase boxes with 100A or more can exceed \$800-\$1,000 .
- **Protection Level:** IP ratings (e.g., IP44, IP54, IP65) affect price. Higher waterproof and dustproof ratings suitable for basements or damp environments increase cost .
- **Pre-wired vs Custom Wiring:** Pre-wired boxes with built-in circuit breakers, meters, and sockets are more expensive but save installation time .
- **Compliance and Certification:** Boxes meeting IEC 61439, NEMA, or local electrical codes may carry a premium due to safety and regulatory compliance .

Typical Options

- Small ABS plastic boxes with 4-6 outlets, IP44-IP54, suitable for light construction...
