

Price of electrical distribution boxes for cold storage rooms

Article Overview

Standard electrical distribution boxes for cold storage typically range from \$150 to \$1,200 per unit, depending on capacity, features, and environmental protection.

General Pricing Overview

The cost of a standard electrical distribution box varies widely based on amperage, number of circuits, material quality, and safety features. Basic models for light industrial or commercial use can start around \$150-\$300, while larger or premium units with advanced features such as surge protection, modular design, or smart monitoring can reach \$800-\$1,200 per unit .

Cold Storage-Specific Considerations

Cold storage environments require distribution boxes that can withstand low temperatures, high humidity, and potential condensation. For these applications, boxes often have IP65 or higher ratings to ensure protection against moisture and dust . Cold storage electrical control boxes may also include specialized components to manage compressors, fans, evaporators, and condensers, which can increase the cost compared to standard distribution boxes .

Factors Affecting Price

- Load capacity: Higher amperage ratings (e.g., 63A-125A) increase cost
