

Prices of cable trays at different angles

Article Overview

Cable trays suitable for any angle typically range from \$50 to \$300 per section, with total installed costs influenced by material, fittings, and labor.

Material and Tray Costs

Cable trays come in various materials, each affecting the price:

- Pre-galvanized steel: Most affordable, suitable for dry indoor environments .
- Hot-dip galvanized steel: More expensive, ideal for outdoor or industrial settings due to corrosion resistance .
- Aluminum: Lightweight and moderately priced, reduces the need for heavy supports .
- Stainless steel (304 or 316): Highest cost, used in hygienic or corrosive environments like food plants or coastal areas . Straight sections of wire mesh or ladder trays typically cost \$50-\$150 per 5-10 ft section, while perforated angle or channel trays for angled installations can range \$100-\$300 per 20 ft section, depending on material and finish .

Fittings and Accessories

For angled installations, additional components are required:

- Elbows, tees, and junctions: Prices vary by size and material, generally \$10-\$50 per fitting .
- Supports and brackets: Essential for holding trays at angles; can account for 20-3...
