

Real price for fiber optic splicing at night

Overview

For most commercial projects, expect to pay \$50-\$150 per fusion splice point - but that number can swing in either direction based on the factors below. Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site conditions. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help. I usually bill T&M, but it works out to about \$175-250 for setup/teardown per site and \$4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable. Add another \$50-75 to prep a new case endspan or \$100-150 for a new case midspan with overcut on. Fusion Splicer: This is the primary tool for fusion splicing, and its cost can range from \$3,000 to \$15,000 or more, depending on the model and features.
