

Router for 30m fiber optic cable

Article Overview

For a 30 Mbps fiber connection, a mid-range Wi-Fi 5 or Wi-Fi 6 router with gigabit Ethernet ports is sufficient, offering reliable coverage and future-proofing without overpaying.

Key Considerations

Speed and Bandwidth: A 30 Mbps fiber connection is relatively modest, so you don't need a high-end Wi-Fi 7 router. A router supporting Wi-Fi 5 (802.11ac) or Wi-Fi 6 (802.11ax) will easily handle this speed while providing stable wireless coverage for multiple devices . **Coverage:** Choose a router that matches your home size. For a small to medium home, a single router with strong antennas is sufficient. For larger or multi-floor homes, consider a mesh system to eliminate dead zones . **Ethernet Ports:** Even with fiber, having gigabit Ethernet ports is useful for wired devices like PCs, smart TVs, or gaming consoles. This ensures maximum speed and low latency for critical devices . **Future-Proofing:** While your current plan is 30 Mbps, investing in a Wi-Fi 6 router can provide better performance for future upgrades and more connected devices without needing to replace your router soon .

Recommended Routers

- TP-Link Archer AX55 – A budget-friendly Wi-Fi 6 router that provides reliable coverage and gigabit Ethernet ports, ideal for small to medium homes .
- Netgear Nighthawk R7000 – A Wi-Fi 5 router with strong performance, suitable for households with multiple devices and moderate coverage needs .
- ASUS RT-AX55 – Another Wi-Fi 6 option with dual-band support and good range, o...
