

Safety Standards for Power Cables and Optical Cables

Overview

The International Electrotechnical Commission (IEC) publishes globally adopted standards that define how cables are designed, tested, and installed. Different types of cables have different characteristics and, as such, are subject to specific directives or regulations. This guide, fixed into a building construction from the 01 July 2017. This means that all these products must be CE marked and have a relevant Declaration of Performance (DoP) detailing its essential performance characteristics. Conductors of insulated cables – Guide to the dimensional. These cables must comply with international electrical cable regulations, which provide a set of requirements, recommendations and procedures for the design, manufacturing, testing and installation of cables, such as their electrical conductivity, mechanical strength or resistance to environmental.
