

Secondary Distribution Box Inspection Card

Overview

The document is an electrical installations inspection checklist designed for weekly use, encompassing various safety and compliance criteria such as the condition of distribution boards (DBs), cables, and the grounding of electrical equipment. To ensure that the electrical testing & pre-commissioning of the control, distribution, and miscellaneous panel are carried out in a manner that is risk-free, productive, and in accordance with good working practice, as required by the project work specifications. It includes yes/no questions on topics like earthing. For distribution boxes, this means scrutinizing seven core areas: Production Machinery Capabilities (Can equipment maintain tolerances?

) Raw Material Traceability (Where do components really come from?

) IP-Rated Testing Procedures (How water/dust-resistant are units under stress?

) Environmental. Download the free Inspection card templates right now! Microsoft excel templates and Google Sheets link are both available. View our free and editable Inspection card templates for Excel or Google Sheets. Ensure that all labels and warning signs are legible. Internal Inspection Open. Firm base with grouting & easily accessible panel (height of leg is equal to 1m) 2. Authorized operator name contact no. Visualization of voltage, current, and type of tools to be used in the socket and panel 5.
