

Specific opening dimensions for distribution boxes

Article Overview

Distribution box openings and enclosures follow common size families, with wall-mounted boxes typically ranging from 200×200×120 mm to 800×600×300 mm, while freestanding cabinets range from 1600–2200 mm in height, 600–1800 mm in width, and 300–600 mm in depth.

Wall-Mounted Distribution Boxes

Wall-mounted distribution boxes are designed for smaller installations and typically have openings or knockouts for cable entry at the top, bottom, or sides. Standard external dimensions usually range from 200×200×120 mm up to 800×600×300 mm, with intermediate sizes available depending on manufacturer and internal layout requirements. The usable internal space is slightly smaller due to wall thickness, gaskets, and mounting hardware. Openings are often designed to accommodate standard cable glands or conduit sizes, ensuring proper bend radius and clearance for wiring.

Freestanding Distribution Cabinets

Freestanding or floor-standing distribution boxes are used for larger installations, such as substations or industrial panels. Typical dimensions are:

- Height: 1600–2200 mm
- Width: 600–1800 mm...
